PHOTOGRAPHIC INTELLIGENCE MEMORANDUM

WITTON PENINSULA, RUGEN ISLAND

This memorandum is prepared in answer to a request for information regarding possible submarine bunkers on the Witton Peninsula, Rugen Island. 25X1D

A study of oblique aerial photography dated [REDACTED]

[REDACTED] did not reveal the presence of any bunker type structure along the Rugen Island coast from Dranske to Kap Arkona. 25X1D

A further study of the above aerial photography and other sources indicates that the construction of the type bunkers mentioned in A/F report B-5426-55 in the location cited would be unlikely.

The height of the coast at Fowen Ort is about 26 meters and decreases gradually toward Dranske. The coastal shelf extends about 800 yards from the coast with the 100 fathom line being approximately 900 yards from the shore. In addition a narrow beach exists for most of the distance from Fowen Ort to Dranske.
